RCSD RFP 17-910
Installation of Unified Communications & VoIP Phone System
Addendum A
Posted: Monday, March 13, 2017

CHANGE TO REQUIREMENT:

Upon review of RFP 17-910, on Page 2 it is stated under the *Proposed Solution MUST include the following: Ability for the system to sense that a fire alarm has been pulled and send a notification (Email, SMS). Maybe a dry contact notification.*

This requirement is being eliminated due to the time constraints, and the varying differences at each site to implement said requirement.

Vendors may provide additional information in regards to this, however it is no longer a requirement of RFP 17-910.
