

Roseville City School District Health Services Guidelines for Evaluating if a Student should STAY home or be SENT home

The purpose of these guidelines is to define what conditions require a student to STAY home or be SENT home.

- **FEVER:** a fever at which a student should STAY or be SENT home is 100.0 degrees Fahrenheit.
The body's temperature varies throughout the day. The temperature also varies with physical activity such as crying or sports. Normal body temp ranges from 94-100 degrees. How a student looks and acts or the whole picture is as important as the temperature. Fever is a symptom not a disease.
- **VOMITING**
- **DIARRHEA**
- **UNEXPLAINED PAIN, CRYING**
- **AN INJURY TO THE HEAD** that results in loss of memory or unconsciousness
- **UNEXPLAINED RASH**
- **Overall condition that prevents the student from functioning in class.** The student's condition

Please note that any deviation from these guidelines will require written description and verification from a medical doctor.
